

Aspiring Junior UX Designer

Currently following a UX Design programme with CareerFoundry, I am looking to start a new career in the field. My background in Care, Education and Non-Profit allows me to use my empathy to understand users’ needs and to use my pro-activity to create intuitive and user-centered experiences.

Work Experience

2019 - 2020	Home Healthcare Provider <i>Care Home Community Provider</i> Morden (United Kingdom)	I provided personal care to clients and made sure they were comfortable as well as guaranteed the maintenance of their environment. I wrote feedback on my actions and observations after each visit to a client. And I had to report to the management team about any change regarding a client situation.
2018 - 2019	English Tutor <i>Academia & Complétude</i> Yvelines (France)	I tutored students from Year 8 to Year 13 to help them improve on their English skills but also coaching them on their self-confidence.
2017 - 2018	Coach (Youth Worker) <i>Life Project 4 Youth</i> Cebu (Philippines)	I was in charge of handling a programme of 15 Youth coming from a disadvantaged economical environment. As a coach, I acted as a consultant in a micro-activity developed by the Youth from the programme. I taught them English, Computer and Communication skills as well as giving them guidance - individually and per group, for their social and professional integration.
